

Module 4

Chapter 1 notes

Midjourney

- **What is Midjourney?**

- Midjourney is a Gen AI tool machine learning such as large language models and diffusion models to transform natural language prompts into images.

- **Setting up Midjourney**

- Register and Create Discord account.
- Head to www.midjourney.com.
- Click on “Add to Server”.
- Create a new private server on Discord

- Add a server → Create my own → for me and my friend → Server Name
- Server setting → App directory → midjourney → Add to server

You will need to have a midjourney subscription

• What can we do using Midjourney?

- You can create Book covers, Logo Inspiration, YT thumbnails, PPT, Assignments, Everywhere you see photos.

EXAMPLES:

• Let's See 2 robots in front of Taj Mahal

- You can create Book covers, Logo Inspiration, YT thumbnails, PPT, Assignments, Everywhere you see photos.

- Obviously, no good results.

Midjourney results:

- If you can think it, you can bring it to life using Midjourney

This is how your interface will look like
