

Module 4

Chapter 4 notes

The MScSMP Formula

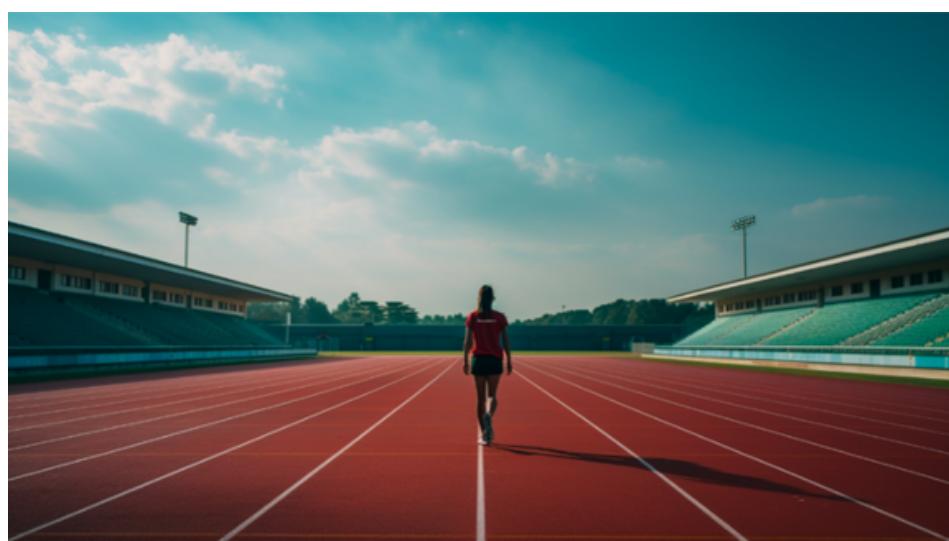

This formula aims to use fewer words but achieve the desired output. See, in Midjourney, there is a 77-token limit, and if written too long, it becomes quite confusing. So, let's understand this prompt well.

- **M (Medium):**

- Anything is possible using Medium, be it a photograph, oil painting, illustration, painting, or any other type of photos you are familiar with.

- **Examples:**

- photograph, athlete walking in sport ground on a empty ground, --ar 16:9

- painting, photograph, athlete walking in sport ground on a empty ground, -- ar 16:9

- **S (Style):**

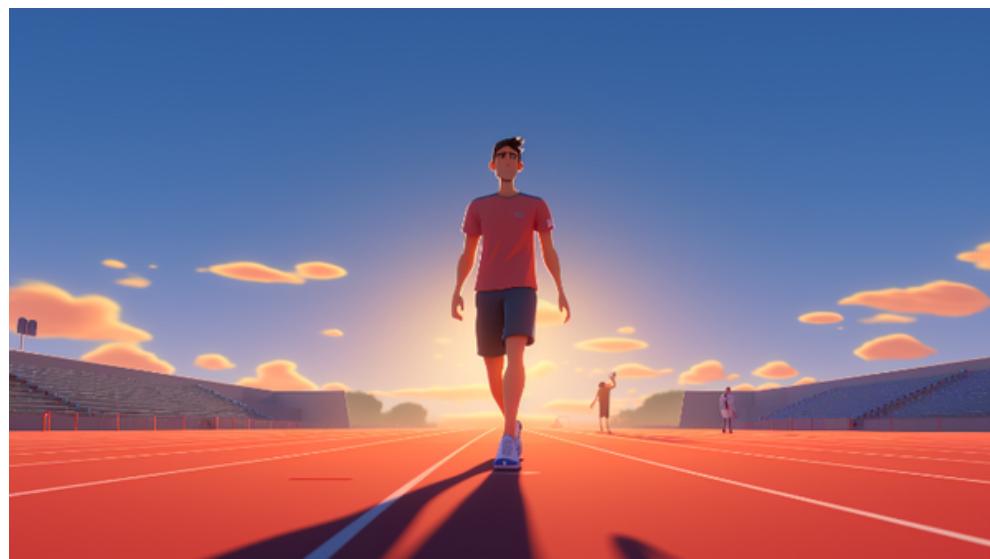

- Style is somewhat interconnected with Medium, there are unlimited styles, and it's impossible for us to know them all.
- So, there's a website called Midlibrary.io where you can see various styles.

- **Examples:**

- Photography, Victorian era cabinet card, athlete walking in sport ground on a empty ground, --ar 16:9

- Photography, Victorian era cabinet card, athlete walking in sport ground on a empty ground, --ar 16:9

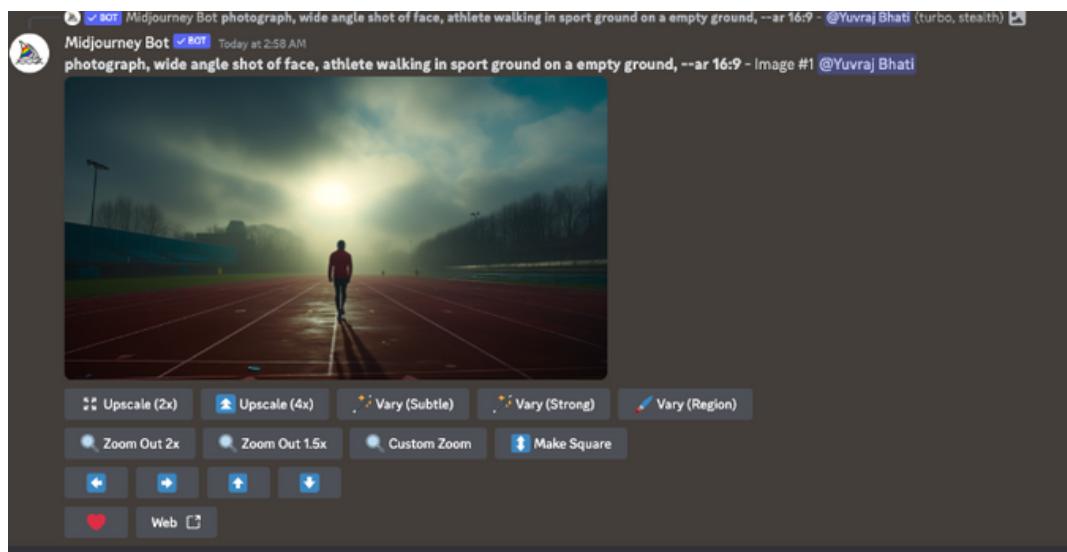

• C (Composition):

- In this, you can incorporate different camera angles, shots, and lighting.

• Example:

- photograph, wide angle shot of face, athlete walking in sport ground on a empty ground, --ar 16:9

- **S (Scene):**

- Using the Scene command, you can define the scene that will help AI to generate best outputs as per your imagination

- **Example:**

- Photograph, Middle shot, Athlete running in an empty ground with a baton in his hand, exhausted, --ar 16:9

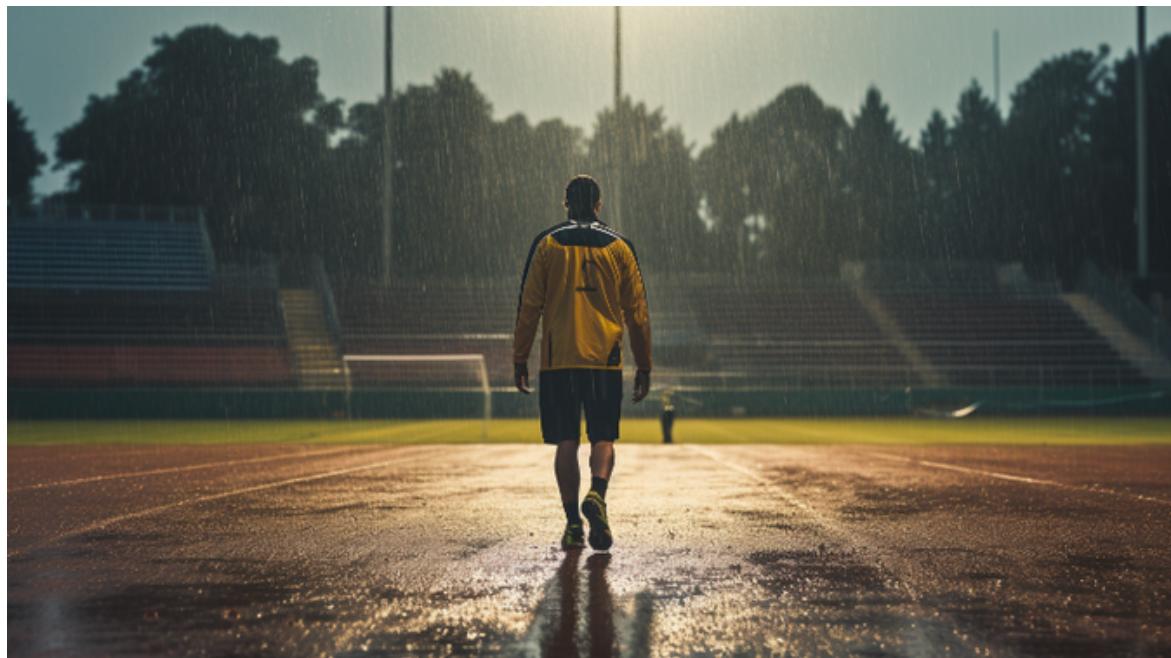

- **M (Modulate):**

- Using this command, you can add anything extra to the image, such as rain, snow, a specific theme, or the overall mood of the photo.

- **Example:**

- photograph, athlete walking in sport ground on a empty ground, raining, Film Grain, --ar 16:9

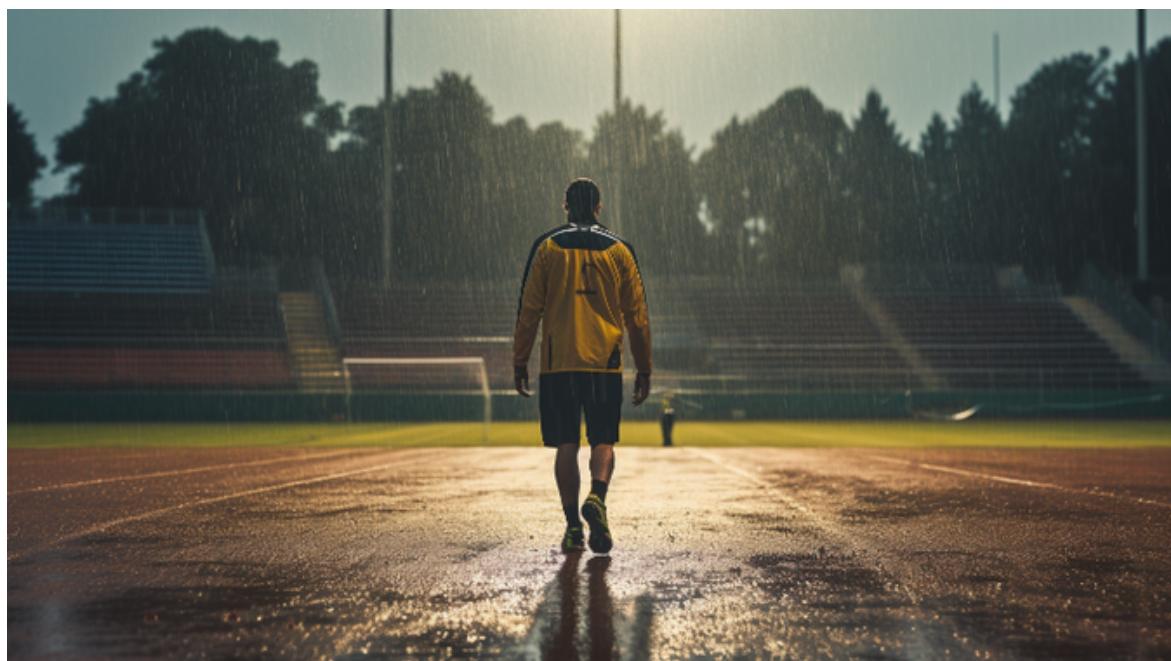

- **P (Parameter):**

- Wherever you see dash-dash (--) is a placeholder for your parameters. For instance, if I was starting with a 16:9 aspect ratio because it's intended for a video.

- **Example:**

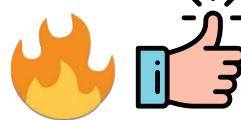

- photograph, athlete walking in sport ground on a empty ground, raining, Film Grain, --ar 16:9

You can Use ChatGPT for prompting on Midjourney. Just feed the RGCA formula and what you learned here.
