

Module 3

Chapter 2 notes

Introduction:

- Andres Erikson emphasizes the importance of learning and mentions that experts spend around 10,000 hours to master a skill.
- Suggests that AI can significantly reduce the learning time.

Learning Process:

- Breaks down the learning process into four steps: finding what to learn, collecting resources and planning, going through sources, and practicing with feedback loops.
- AI tools like ChatGPT 4.0 with plugins can enhance the learning process.

Steps for Learning:

- **Reactive Machines:**

Clearly identify the skill or topic you want to learn.

- **Resource Collecting & Planning**

Resource Collection and Planning:

- **Going Through Resources:**

Plugins like Vox Scripts, Webpilot, Whimsical Diagrams, and Chat With PDF aid in summarizing and visualizing content.

Employ the 80/20 rule (Pareto Principle) for efficient learning.

- **Going Through Resources:**

Plugins like Vox Scripts, Webpilot, Whimsical Diagrams, and Chat With PDF aid in summarizing and visualizing content.

- **Practice and Gamification:**

Create gamification quizzes using follow-up prompts to aid in memorization.

Emphasizes spaced repetition for long-term retention.

- **ChatGPT 3.5 Jailbreak:**

Discusses a chrome extension (WebGPT) for free internet searches using ChatGPT.

Introduces specific AI tools like pdf.ai for question-answering and Tutorai.me for structured learning programs.

- **Specific AI Tools:**

Consensus AI is recommended for research, providing summaries of research papers.

Tutorai.me offers customized learning programs with modules, examples, and quizzes.

Various free tools for learning with a credit limit, suggesting a workaround using multiple email registrations.

Let's See Prompt Checklist
