

Module 3

Chapter 4 notes

Automation with Zapier, GPT & Various Applications:

- Step 1: **Explore**
 - Begin by exploring and configuring the actions section in Zapier.
- Step 2: **Create Your Own GPT**
 - Visit the Zapier GPT configuration page.
 - Input code if available in the Actions section.
 - Use Zapier to connect with URLs of up to 6,000 websites.
- Step 3: **Privacy Policy Paster**
 - Use the provided privacy policy paster from Zapier.

- Step 4: **Create Action in Zapier**
 - Create a Zapier account.
 - Add new actions based on your requirements.

Example 1: Google Docs Action

- Select Google Docs as the action app.
- Connect your Google account.
- Set document details such as name, folder, and enable the action.
- Make sure the action is activated (green).

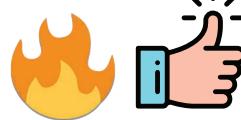

Example 2: Send Gmail Action

- Choose the Gmail action in Zapier.
- Connect your Gmail account.
- Configure email details like recipient, subject, and allow AI to generate the body.
- Name the action (e.g., "Send Meal Plan") and submit.
- Step 5: **Connect GPT and Required Actions**
 - Copy the link from GPT instructions.
 - Modify the link for required actions.
 - Create GPT instructions for each action.

- **Step 6: Publish and Start**
 - Publish the actions.
 - Allow necessary permissions.
 - Inform the team and start the automated process.
