The Sarcastic Tale of Ria and Rohan's 10th Grade Adventures

Once upon a time in a school that totally wasn't like every other school in India, Ria and Rohan were gearing up for their 10th-grade board exams. Because, you know, life's all about those marks, right?

Ria, with her *oh-so-trendy* oversized glasses, was the self-proclaimed "queen of multitasking." She could text, eat samosas, and pretend to study all at the same time. Talent, right?

Rohan, on the other hand, had just discovered the magic of "last-minute studies."

Why bother all year when you can cram everything in one night? *Genius!*

One day, Ria came across an article online titled, "How to Score 100% in Boards." Because, obviously, the internet knows best. She decided to share her newfound wisdom with Rohan.

"Rohan! This article says we should study for 25 hours a day!"

Rohan, looking puzzled, replied, "There are only 24 hours in a day, Ria."

"Minor details," she shrugged.

Their school had this *super fun* idea of surprise tests. Because who doesn't love surprises, especially in the form of algebra and history dates?

During one of these surprise tests, Rohan tried to sneak a peek at Ria's paper. But Ria, being the ever-vigilant student, had developed a technique to shield her answers using her arms, textbook, and occasionally her ponytail. *Mission Impossible level stuff.*

Post-exam discussions were a ritual. Ria would always start with, "I'm definitely failing this one." And then, like clockwork, she'd top the class. *Such unpredictability!*

Rohan's strategy was different. He believed in the power of the "educated guess." If the answer felt right in his heart, it went on the paper. Who needs logic when you have intuition?

One day, their teacher announced a group project. Because, of course, group projects are the best way to test individual skills. *Makes total sense.*

Ria and Rohan teamed up, and their project was on "The Impact of Social Media on Teens." Ria spent hours researching, while Rohan... well, he spent hours on social media. For "practical knowledge," he claimed.

The day before submission, they met to compile their findings. Ria had pages of notes, charts, and graphs. Rohan had memes. *Balanced contribution.*

Presentation day arrived. Ria started with statistics and studies. Rohan chipped in with, "And here's a meme that perfectly summarizes our generation's relationship with social media." The class erupted in laughter. *Who said education can't be fun?*

As the year progressed, Ria and Rohan had their share of ups and downs. From late-night study sessions fueled by chai and Maggi to heated debates over whether Pythagoras was a mathematician or a type of dinosaur.

Board exams loomed closer. The school organized "special classes" during holidays. Because who needs rest and relaxation when there are equations to solve?

Finally, the D-day arrived. Ria had her lucky pen, and Rohan had his lucky charm – a tiny Ganesh idol. They tackled each paper with a mix of determination and desperation.

Results day was a mix of anxiety and anticipation. Ria scored exceptionally well, no surprises there. Rohan, with his unique study techniques, managed to pass with decent marks. *Miracles do happen.*

They celebrated their success with golgappas and ice cream, reflecting on their roller-coaster year.

In the end, they realized grades were just numbers. What mattered were the memories made, the lessons learned, and the memes shared.

And so, in the grand tradition of 10th graders everywhere, Ria and Rohan moved on to the next adventure, armed with sarcasm and a dash of wit.

The Quirky Chronicles of Priya: Google India's Unofficial Mascot

In the bustling tech hub of Bangalore, where every other person is a software engineer, meet Priya, a 25-year-old who works at Google India. But not just any role, oh no! She's a "Techno-Cultural Synergy Specialist." Fancy title, right? Basically, she ensures the coffee machine works and occasionally codes.

Now, Priya's office was *the place to be*. With bean bags instead of chairs and a slide instead of stairs. Because why walk when you can slide into your meetings?

Every morning, Priya would walk into the office with her oversized tote bag, filled with essentials: laptop, charger, yoga mat, three types of hand sanitizers, a mini snack bar, and a tiny plant named 'Groot'. *Always be prepared, right?*

Her desk was a sight to behold: a perfect blend of chaos and creativity. Amidst the tech gadgets, there was a 'motivational' poster that read: "Stay Calm and Google It." *Because, why use your brain when there's Google?*

Priya's best friend at work was Aisha, a "Digital Overlord" (read: senior developer). Their favorite pastime? Judging people's coffee choices. "Another almond milk latte? Oh, someone's trying to be fancy!"

Every day at 11 am, Priya faced her biggest challenge: the battle for the conference room. It was like a scene from 'The Hunger Games', but with tech nerds. May the odds be ever in your favor, Priya!

Lunchtime was an event. The Google cafeteria was a foodie's dream. From vegan sushi to butter chicken, they had it all. Priya's strategy? A little bit of everything. *Who needs a diet when there's free food?*

Post-lunch, Priya would attend the "mandatory fun" team-building activities. Last week, they had a "Blindfolded Coding Challenge." Because coding isn't hard enough, right?

One day, Priya was assigned to a top-secret project, codenamed "Project Unicorn." Turned out, it was just a new color scheme for Google Calendar. *So mysterious!*

Priya's evenings were spent attending tech meetups and workshops. Her favorite one? "Meditation for Coders." Because even coders need inner peace.

On Fridays, the office turned into a party zone. DJ, dance floor, the works. Priya's signature move? The "Robot Dance." *So apt for a tech company.*

One memorable day, Priya received an email from the CEO. Heart racing, she opened it. It read: "Hey, someone said you're the one who knows how to fix the coffee machine? It's acting up again." *Ah, the perks of being indispensable.*

Priya's weekends were a mix of relaxation and side hustles. From teaching yoga to fellow techies to running a blog titled "Confessions of a Google Girl," she did it all. Her family, of course, had no clue what she did. At family gatherings, when asked about her job, she'd say, "I work at Google." The usual response? "Oh, so you're the one who decides the Google Doodle? Nice!"

Dating was... interesting. Every date would start with, "So, can you fix my laptop?" Ah, the joys of working in tech!

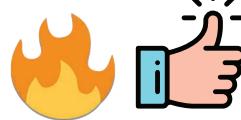

But amidst the coding marathons and caffeine overdoses, Priya loved her job. She was living the dream: a blend of tech, culture, and a dash of sarcasm.

In the grand world of tech, Priya was a legend in her own right. With her wit, charm, and ability to fix coffee machines, she was Google India's unsung hero.

And so, in the heart of Bangalore, Priya's adventures continued, one code (and coffee) at a time.
